

# Program Overview

**Shiver me timbers ...**

*There's a K-6 science program on the horizon!*

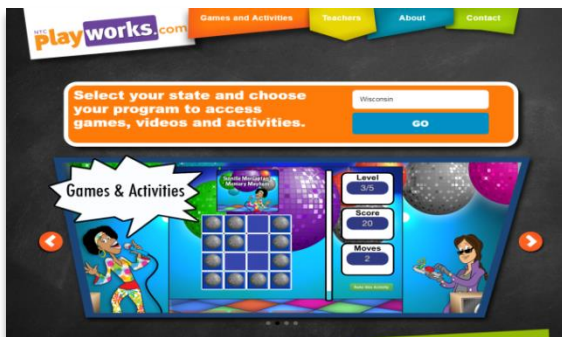

The *Treasure Trove of Conservation Cove* is performed by two professional actors who lead your students through a fun pirate-themed adventure, all while teaching about energy conservation.

In this 25-minute play, Captain Doorknob is on the hunt for the treasure of Conservation Cove, but the terrible Pirate Pie-Rat is terrorizing the island by wasting natural resources ... including the resources that power the captain's ship! Will Captain Doorknob and your students learn enough about energy efficiency to defeat Pirate Pie-Rat and save the ship?

Along with the in-school assembly, online games and activities are provided to expand upon the educational content of the program.

## Educational Concepts:

- What energy and electricity are
- The uses of energy
- How energy is wasted
- What YOU can do to conserve energy
